Application No.: 09/971,720

- 1. Discuss the Examiner's position that updating the states of the registers in Beatty corresponds to performing a graphical operation on the web page for dynamic visualization of the graphical elements indicative of the underlying architecture system.
 - a. Specifically, the Examiner's position that updating the registers in Beatty can be considered a dynamic <u>visualization</u> of the <u>graphical elements</u>.
- 2. Discuss the Examiner's position that updating the states corresponds to the feature wherein the dynamic visualization provides a graphical representation of collaborative interactions between architectural components of the underlying architecture of the software system.
